1) 2020-8.2 Elevator Industry Field Employee Safety Handbook. CEU = .1 hour

- a. Webinar
- b. Bring your 2020 safety Handbook to class or, if appropriate, your company's safety policies. We will address one of the nine safety absolutes; time will not allow us to review them all this year.
- c. Please be prepared to review and discuss Pit Access/Egress, Section 8.2. This presentation is of extreme importance. This is a topic faced daily by elevator professionals that are accessing dark, dangerous, and potentially fluid filled spaces. Over time, some might become lax in their efforts and not fully understand the repercussions of their actions. Our intent is to review the general access procedures, to reinforce and if necessary, re-educate. Improper pit access has led to many life changing events over the years and the number one common denominator has been human error.
- d. There will be a Quiz at the end to promote attention and learning. You may wish to take notes.

2) ASME A17.1 – 2022 Code update, Parts 1-3

CEU= .4

- a. Webinar
- b. Today's A17.1-2022 code update class will be based on the summary of changes. This class is going to be the first part of a two-part series that will continue in 2026.
- c. This presentation contains many revisions of the newest A17.1 code, Parts 1, 2 and 3. We will be reviewing the new definitions, hoistway strength and illuminations, pit access, emergency radio coverage, door reopening device, ACO, UCM and emergency brake, listed devices emergency communications and FEO, and many more requirements for electric and hydraulic elevators.
- d. There will be a Quiz at the end to promote attention and learning. You may wish to take notes.
